Subject:	Users should be able to trigger a resend of their Invitations' mails		
Description	<p>Mails get lost, deleted or end up in spam folders all the time. As it is, users can't resend the invitation mail to their invitees and if they attempt to re-enter the address they get an error that their friend is already invited.</p> <p>Users should be able to re-attempt invites, preferably with some kind of limit to prevent abuse (e.g. 3 times).</p>
