Synnefo - Feature # 1403

Status:	Closed	**Priority:**	Medium
Author:	Vangelis Koukis	**Category:**	Cyclades API
Created:	10/03/2011	**Assignee:**	Giorgos Verigakis
Updated:	10/10/2011	**Due date:**	
Subject:	Update API implementation for server/image metadata based on latest version of spec		

Description

Update API implementation for handling of server and image metadata, allow creation of new metadata items in POST call.

This ticket concerns the semantic change of allowing an 'Update metadata' operation to also create new metadata items. The API spec prescribes a URL change from .../meta to @.../metadata', this will have to happen at a later stage to avoid breaking the UI client.

Change Update Metadata to create non-existing keys

Update Metadata methods for servers and images
used to ignore keys that did not exist. This patch
will create them instead.

History

#1 - 10/03/2011 05:23 pm - Giorgos Verigakis

There are many incompatible changes in the new spec that will break the clients. Commit 7cc3c7d94d48761ed12bb675b541602b78d38248 fixes update metadata which was a bit ambiguous, but the rest should probably go into a separate ticket to update the whole API to the new spec.

#2 - 10/10/2011 02:12 pm - Vangelis Koukis

- Status changed from Assigned to Closed

Opened #1462 to track updating the API implementation to latest version of the spec draft, closing ticket.
