Synnefo - Feature # 1689

Status:	Closed	**Priority:**	Medium
Author:	Antony Chazapis	**Category:**	Pithos
Created:	11/24/2011	**Assignee:**	Sofia Papagiannaki
Updated:	02/08/2013	**Due date:**	
Subject:	Advanced im invitations		

Description

More im advancements:

- A user is always created in the PENDING state.
- The admin can view/alter pending users in a separate page.
- Upon accepted, send welcome mail.
- Invitation changes:
    - *Send to a "sign-up" page where the user can select the login method.*
    - *Upon user create/profile edit the user should be automatically accepted if invited.*
    - *Each invitation should be used to create one user. Disable once a user is created.*

- If invitations are disabled (some settings parameter):
    - *The "sign-up" page is not private.*
    - *All users remain pending until they activate their account via email.*

- Make the auto-accept step easy to change (separate function/file or something).
- Login targets must accept "create or just login" option.
- Migrate currently invited users to local if possible (create passwords and send mails).
