

Synnefo - Bug # 1928

| | | | |
|--|----------------------------------|------------------|---------|
| Status: | Closed | Priority: | High |
| Author: | Vangelis Koukis | Category: | Astakos |
| Created: | 01/24/2012 | Assignee: | |
| Updated: | 02/08/2013 | Due date: | |
| Subject: | Document authentication workflow | | |
| Description | | | |
| <p>Please write a short description detailing the entire authentication process, from the moment an unauthenticated client connects to a service backed by astakos, to the moment the client is authenticated and has an API token.</p> <p>There are at least two distinct use cases:</p> <ul style="list-style-type: none">a) protection of web-based servicesb) protection of API calls: get an API token, use it to authenticate against an astakos-backed API <p>Please document the entire workflow: clients, servers, cookies, tokens, for each of the above two use cases, and any other cases you can identify.</p> <p>This is a prerequisite for Alpha2 deployment.</p> | | | |
