

Synnefo - Bug # 1986

Status:	Closed	Priority:	High
Author:	Vangelis Koukis	Category:	Cyclades Images
Created:	02/02/2012	Assignee:	Giorgos Verigakis
Updated:	02/07/2012	Due date:	
Subject:	Disallow creation of VMs from images deleted in Plankton		
Description			
<p>Plankton allows for quering an image whose corresponding file on Pithos has been deleted, by looking for previous versions of the file and returning metadata info with the deleted_at flag set.</p> <p>This is useful for quering metadata of past images, but shouldn't lead to Cyclades allowing VM creation from deleted images.</p>
