

Firewall on Demand - Feature # 2072

Status:	Assigned	Priority:	Low
Author:	Leonidas Poulopoulos	Category:	API
Created:	02/20/2012	Assignee:	Leonidas Poulopoulos
Updated:	03/05/2012	Due date:	
Subject:	Formset support in rule submission		
Description			
Support for multiple rule submission at once. This may require changes in the nxpy package and the proxy component. Such a change would boost DDoS attacks mitigation especially when the rules are applied via the REST api (faster than the GUI for this case)

History

#1 - 02/24/2012 03:58 pm - Leonidas Poulopoulos

- Status changed from New to Assigned
- % Done changed from 0 to 10

Implemented elementary formset support

#2 - 03/01/2012 04:33 pm - Leonidas Poulopoulos

- File formset.png added

Implemented basic formset rendering with jquery formset support (same as admin inline). Screenshot from dev:

formset.png

#3 - 03/05/2012 05:09 pm - Leonidas Poulopoulos

- % Done changed from 10 to 80

Rule formset is almost done. Tested with dev switch and works.
Have to implement some basic formset clean in forms.py
