

Synnefo - Bug # 2471

Status:	Closed	Priority:	Medium
Author:	Sofia Papagiannaki	Category:	Astakos
Created:	05/29/2012	Assignee:	
Updated:	02/08/2013	Due date:	
Subject:	Register account activation email sending		
Description	use a flag whether it has been sent an activation email to the user or not		

Associated revisions

Revision 751d24cf - 05/30/2012 01:38 pm - Sofia Papagiannaki

Register the date a user activation email sent and reset it when the user becomes active (for future use)

This field can have the following values:

- epoch: signifies the user has been created before adding the specific field (so we have no actually information whether an activation email has been sent or not)
- NULL: signifies the user is active or no activation email has been sent
- other date (except epoch): the date the activation email sent

Passing the -n option in list users snf command shows only the new users (created after adding the field) who have not received an activation.
