

## Synnefo - Bug # 2944

<b>Status:</b>	Closed	<b>Priority:</b>	Medium
<b>Author:</b>	Vangelis Koukis	<b>Category:</b>	Cyclades UI
<b>Created:</b>	10/19/2012	<b>Assignee:</b>	Christos Stavrakakis
<b>Updated:</b>	10/24/2012	<b>Due date:</b>	
<b>Subject:</b>	UI does not refresh IPv4/IPv6 on server activation		
<b>Description</b>	<p>Something is wrong with the way the UI refreshes.</p> <p>Even though IPv4/IPv6 addresses are updated <b>before</b> the VM changes to -&gt; ACTIVE in the API reply, the UI fails to show IPv4/IPv6 occasionally ("not set"). Everything's fine after a page reload.</p>		

### History

#### #1 - 10/19/2012 03:22 pm - Vangelis Koukis

Also evident when Connecting machines to a private network. The machine count will not refresh, until a manual page reload.

#### #2 - 10/24/2012 10:05 pm - Vangelis Koukis

- Status changed from New to Closed

- Assignee changed from Kostas Papadimitriou to Christos Stavrakakis

Solved by updated 0.11.0-rc packages for snf-cyclades-app.

The API was failing to update the timestamp on the network object.

The UI was using the answer of GET /networks to determine if the IPv4/IPv6 addresses should be updated in the server list.

Closing ticket.
