./kamaki - Bug # 3187

Status:	Closed	**Priority:**	Medium
Author:	Stavros Sachtouris	**Category:**	
Created:	01/17/2013	**Assignee:**	Stavros Sachtouris
Updated:	01/29/2013	**Due date:**	01/25/2013
Subject:	path prefix wildcard @ kamaki-store commands		
Description			

Kamaki store commands need a wildcard functionality. A simple prefix-aware approach will be implemented. The idea is already implemented in kamaki-store-list in the sence that all keywords are handled as prefixes.

Simple Specs:

kamaki store <command> ... <container>:   [--exact-match]

e.g. List all files starting with my: kamaki store list pithos:my

e.g. List only a fyle called my: kamaki store list pithos:my --exact-match

#3 - 01/29/2013 04:54 pm - Stavros Sachtouris

- Status changed from New to Closed

- % Done changed from 80 to 100

Instead of a wildcard mechanism, some store commands behavior changed to use remote or local paths as prefixes. This is the case when directories are involved, e.g. download cont:remote/path local/dir --recursive will now download everything under cont:remote/path as local/dir/<full path>
