

Synnefo - Bug # 3395

Status:	Assigned	Priority:	High
Author:	Vangelis Koukis	Category:	Astakos
Created:	03/07/2013	Assignee:	Kostas Papadimitriou
Updated:	03/07/2013	Due date:	

Subject: Astakos does not use CONTACT_EMAIL consistently, MISLEADING documentation

Description

Notifications of account creation go to ADMINS.

Notifications of account activations go to DEFAULT_CONTACT_EMAIL.

"DEFAULT_CONTACT_EMAIL" does not make sense as the name of the setting.

Moreover, Its documentation is misleading:

```
# Address to use for outgoing emails
```

```
ASTAKOS_DEFAULT_CONTACT_EMAIL = 'support@oceanos.grnet.gr'
```

Where is this "address" used? In the From: (as one would expect),
or in the To: field?

Please fix this.
