Synnefo - Bug # 3420

Status:	New	**Priority:**	High
Author:	Georgios Tsoukalas	**Category:**	kamaki
Created:	03/08/2013	**Assignee:**	Stavros Sachtouris
Updated:	03/08/2013	**Due date:**	
Subject:	kamaki pool initialization		

Description

Kamaki does not offer http connection pool size initialization options to its clients,
nor itself initializes the pool from a setting or even a hardcoded default.

Pooling creates synchronization complexities and clients must be able to control its size in order to address it.
