

Pithos Web Client - Feature # 3575

Status:	Closed	Priority:	High
Author:	Constantinos Venetsanopoulos	Category:	
Created:	04/10/2013	Assignee:	Christos KK Loverdos
Updated:	04/19/2013	Due date:	
Subject:	Refactor the view of the Sharing procedure		
Description			
<p>Currently, when right clicking on a File one has two options wrt sharing:</p> <ol style="list-style-type: none">1. Publish2. Sharing <p>With "Publish" Pithos creates a public link for the file. Then anybody who has this link can access the file without signing-in. Public files do NOT appear under Pithos users' "Shared with me" section.</p> <p>With "Sharing" one can add a list of users or groups and grant them access to the file. Then this file will appear under the "Shared with me" section of all the users that share it. Furthermore, a link will be created for this file. To access the file using this link, one must sign-in and already have the file as shared.</p> <p>The functionality will stay the same, but we will change how it is presented to the user for simplicity and uniformity:</p> <p>When right clicking on a File one has only one option:</p> <ol style="list-style-type: none">1. Share <p>Clicking "Share" opens an overlay with two sections each section clearly separated and with a checkbox:</p> <ol style="list-style-type: none">1.1 [checkbox] Private sharing (Subtitle: "Only people explicitly granted permission can access. Sign-in required.")1.2 [checkbox] Public on the Internet (Subtitle: "Anyone who has the public link can access. No sign-in required.") <p>Checking on the first (1.1) the section expands and we have the menu currently on the old "Sharing" overlay. Furthermore, we need a "Add everybody" button that will add all Pithos users to the list. Also we need the notice over the list of users: All users in the list will find the shared file under "Shared with me"</p> <p>Checking on the second (1.2) the section expands and produces the public link (the menu currently on the old "Publish" overlay).</p>

History

#1 - 04/12/2013 06:26 pm - Christos KK Loverdos

- Status changed from New to Assigned
- % Done changed from 0 to 70

Check dev84. Implemented in File->Share for now. Will also do it for Folder->Share.

#2 - 04/15/2013 03:33 pm - Christos KK Loverdos

- Status changed from Assigned to Feedback
- Assignee changed from Christos KK Loverdos to Constantinos Venetsanopoulos

I see that currently, there is no "Publish" functionality for Folders. So, I am leaving it as it is.
The unified Public/Private Sharing dialog is for Files only.

#3 - 04/15/2013 04:17 pm - Constantinos Venetsanopoulos

- Status changed from Feedback to Assigned

- Assignee changed from *Constantinos Venetsanopoulos* to *Christos KK Loverdos*

OK, we are leaving Folders as is without "Publish" for now.

One comment: Remove the headers line: "Users/Groups Read Only Read/Write" when the list is empty.

Also separate the two top level options with a horizontal line or something to keep things clear.

#4 - 04/15/2013 07:24 pm - Christos KK Loverdos

- % Done changed from 70 to 80

#5 - 04/16/2013 01:43 pm - Christos KK Loverdos

- % Done changed from 80 to 90

#6 - 04/19/2013 03:20 pm - Christos KK Loverdos

- Status changed from *Assigned* to *Closed*

- % Done changed from 90 to 100
