Synnefo - Bug # 3661

Status:	Closed	**Priority:**	Medium
Author:	Georgios Tsoukalas	**Category:**	Cyclades API
Created:	04/24/2013	**Assignee:**	Christos Stavrakakis
Updated:	02/26/2014	**Due date:**	
Subject:	cyclades-usage-verify misreports 0 usage as non-existing		

Description

In certain occasions, for example when a user has non-zero VMs but 0 Networks,
the following spurious warning is emitted:

#snf-manage cyclades-usage-verify --userid=UUID
 Resource network.private exists in QH for UUID but not in DB

Revision 39d44eba - 04/30/2013 05:05 pm - Christos Stavrakakis

reconcile-resources: check that user exists in QH

Do not consider 0 usage for users and resources that are not included in
Quotaholder resources list, since Quotaholder returns zero usage for all
users and all resources. If a user/resource does not belong to QH
respond then it can not be an Astakos user.
