

./kamaki - Feature # 4810

Status:	Resolved	Priority:	Medium
Author:	Stavros Sachtouris	Category:	kamaki
Created:	12/23/2013	Assignee:	Stavros Sachtouris
Updated:	02/05/2014	Due date:	01/18/2014
Subject:	Allow pithos commands to recognise users by username		
Description			
<p>The A/-account argument, if failed to match a user UUID, should try to match a user name instead and resolve the UUID from that. This might cost an extra http request per call, but it will improve the intuitiveness of all pithos-related commands that can refer to shared objects</p>			

Associated revisions

Revision 023d5ada - 02/05/2014 03:16 pm - Stavros Sachtouris

Recognise usernames in --account args (or similar)

Refs: #4810

Arguments --account and --to-account can now accept usernames along with uuids

Kamaki attempts to recognise the argument as a uuid. In case of failure, it attempts to recognise it as a username. If it fails again, it produces an error.

Also, restore kamaki file publish/unpublish
